AI Resume Analyzer – STQA Project

ZJ

F

Share

Backlog

Literature review on ATS systems

Dataset collection
(Strong/Average/Weak resumes)

Requirement analysis

To Do

Write SRS Document

Create Use Case Diagrams

<https://trello.com/b/RtR05Xd7/ai-resume-analyzer-stqa-project>

1/4

Design ERD / Database Schema

Create UI Wireframes

Write Test Plan Document

Write Test Cases (minimum 10–15)

Set up GitHub repository

In Progress

Resume PDF upload module

PDF text extraction (PDFMiner)

TF-IDF Feature Extraction

Logistic Regression model training

Resume scoring engine

Feedback generation module

Flask frontend integration

Testing

Functional Testing – Upload module

Functional Testing – Scoring engine

Functional Testing –
Classification output

Integration Testing – Frontend
↔ Backend ↔ ML Model

System Testing – Full workflow

Automation scripts
(Selenium/Cypress – 2–3 test
cases)

1. Automate: Valid PDF upload
and score display

2. Automate: Invalid file type
rejection

3. Automate: Score
classification label verification

Bug Reported

1. System accepts non-PDF
files without error

2. Empty PDF upload shows no
validation error

3. Large PDF causes timeout or
crash

4. Resume with no skills gives
wrong score

5. CGPA not detected if written
as "GPA"

6. Score exceeds 100 unexpectedly
7. Classification shows Strong when score below 75
8. Feedback doesn't change between Weak and Average
9. Password-protected PDF crashes the page
10. Skills not detected if comma-separated
11. No loading indicator during processing
12. No "Analyze Another Resume" button

Bug Fixed / Retesting

Done

- Project proposal submitted
- Trello board setup
- Team roles assigned
